IQAC - ENTITY RELATIONSHIP DIAGRAM

8 core entities | Chen notation | all 15 core relationships

NOTATION

Rectangle: entity Diamond: relationship Oval: attribute
Underlined: key [AK]: alternate key ?: optional attribute
Dashed oval: derived score (calculated and stored)
Double line: total participation; (1,1) exactly one
(0,1) optional parent; (0,N) zero or many children

Foreign keys are represented by relationships. Faculty/HOD users require a department; other user roles may omit it.

A verification log targets exactly one faculty submission OR department metric. The three portal-support tables are outside this core ER.
